

Thank you for your interest!

August 2015

The aim of wrapeat is to supply your school in the Western Cape with healthy fresh lunch/ lunch packets and additionally raise awareness for healthy nutrition.

We have established a team of experts in this field:

- Chef, who acquired his skills in the best kitchens of France
- French chef from a cooking school and her team
- South African chef owning a wonderful kitchen
- South African expert in ethical agriculture
- German project manager with expertise in logistics
- South African project manager

We share the devotion to healthy nutrition coming from an ethical background.

This means, that we commit to purchase fresh seasonal products from local farms, who work fairly in order to then, - to give you an example- prepare delicious wraps which the students will be able to enjoy in time for their lunch break.

We have brainstormed what a lunch packet should contain.

If you have a kitchen/canteen or a lunchroom on site, we would have endless possibilities – especially to offer warm dishes or simply to create a food bar.

Your wish is our command!

If there is no canteen on site – no problem! We have created our own products, which can be enjoyed without cutlery and/or dishes.

The prices will be kept in line with the usual market prices.

In order to calculate fair prices, we have some questions:

Where are you located?

How many students are interested?

Do you have a kitchen, canteen or lunchroom? →

This is how we go about it:

1. Presenting our proposal including menu to the board
2. Discussion
3. Agreement
4. Survey to the school community in order to establish numbers to calculate respective prices
5. Information evening for parents and staff with tasting
6. Pre-ordering/prepaying
7. Fresh delivery – enjoy the lunch – fit and ready to work

We hope that you are interested and we are up and running from October onwards.

Kind regards,

Team wrapeat
